The image shows a Jupyter Notebook interface in a web browser. The top panel displays the URL `localhost:8888/notebooks/Untitled.ipynb?kernel_name=python3`. The notebook title is "Untitled" with a status of "Last Checkpoint: 3 minutos atrás (unsaved changes)". The menu bar includes File, Edit, View, Insert, Cell, Kernel, Widgets, and Help. The toolbar contains icons for saving, creating new cells, and running code. A red box highlights the code input area where `In [ ]: print("Olá Mundo")` is entered. Below this, another red box highlights the "Run" button in the toolbar. The bottom panel shows the execution result: `In [1]: print("Olá Mundo")` followed by the output `Olá Mundo`. The bottom of the image shows the Windows taskbar with the Anaconda application running.

```
In [ ]: print("Olá Mundo")
```

jupyter Untitled Last Checkpoint: 4 minutos atrás (unsaved changes)

Testar se Anaconda está Funcionando. Se tudo deu certo...

The screenshot shows the JupyterLab interface. At the top, there's a header with the Jupyter logo and 'Quit' and 'Logout' buttons. Below the header, there are tabs for 'Files', 'Running', and 'Clusters'. The 'Files' tab is active, showing a file manager view. The main area displays a list of files: 'TesteAnaconda.ipynb' and 'Untitled.ipynb'. A context menu is open over the 'Untitled.ipynb' file, showing options like 'Duplicate', 'Rename', 'Move', 'Download', 'View', 'Edit', and a trash icon. The trash icon is circled in red. The background features a large, faint 'Py' logo.
